

Aeration Industries  
International  
a newterra company

## Your partner in treating Food and Beverage Wastewater

*Partnering to give you peace of mind, so you can focus on production*

We understand you need to meet a rigorous set of quality standards and we are here to help you design and implement a solution. We will partner with you to design a customized solution to meet quality requirements and keep solids in suspension, keeping your aeration basin free from sludge buildup... giving you the assurance you need, so you can focus on quality production.

## FEATURES

Rentals  
Available!

- Surface mounted for simple installation and maintenance
- Flexible, effective, durable performance
- Supplemental aeration for evolving conditions while leveraging your existing equipment
- Reliable mixing to reduce sludge settlement
- Components constructed of stainless steel
- Customized bearings promote durability in corrosive environments
- Mix and aerate deep tanks, up to 9m

With more than 40 years of experience, we have *proven* we can offer a solution that is *right* for you.
