International
a newterra company

Lagoon

More than 40 years of experience treating lagoon systems

With thousands of installations worldwide and years of experience, we can partner with you to create customized solutions for your wastewater challenges.

- Flexible equipment provides wastewater mixing and aeration in one unit
- Customized solutions
- Thorough mixing for even oxygen dispersion through entire basin
- Superior sludge movement and reduced settling
- Equipment accessibility from top of the basin for easy maintenance
- Engineered, robust propeller designed to prevent fouling
- Years of experience in municipal and industrial applications
