Flexible Solutions for Unpredictable Landfill Leachate Wastewater Treatment

Reliable performance for the long-term

We understand the unpredictable nature of landfill leachate wastewater treatment due to seasonality and facility aging. We also understand how punishing leachate wastewater can be to your wastewater equipment. The equipment and solutions we offer will provide the flexibility and reliability to match your operational challenges in landfill leachate wastewater treatment systems.

BENEFITS

- Proven reliability in unpredictable conditions
- Modular designs offer flexibility for any application
- Customized installation options for fluctuating water depths
- Equipment can be optimized to respond to inconsistent loads for maximum efficiency
- Simply add additional equipment to increase capacity
- No need to drain the pond for installation or maintenance

FEATURES

- Surface mounted with float mounts
- Mixing to reduce sludge settlement
- Easy to install and maintain at the surface
- Wetted components constructed of stainless steel
- Chemical-resistant bearings promote durability in harsh environments
- Adaptable for supplemental aeration
- Mix and aerates depths from 5ft to 33ft (1.5m-10m)
- Up to three (3) year warranty
