PARTNERING TO GIVE YOU PEACE OF MIND, SO YOU CAN FOCUS ON PRODUCTION

BENEFITS

We understand you need to meet a rigorous set of quality standards and we are here to partner with you to design a customized solution to meet your needs. We will work with you to find an effective way to optimize oxygen dispersion, reduce sludge accumulation and eliminate the need for costly dredging.

AIRE-O₂ TRITON® PULP AND PAPER AERATOR/MIXER

FEATURES

- Horizontal mixing provides better dispersion, directional control and no splashing
- Elevated blower mount and pedestal for increased corrosion protection
- Easy to install and maintain without draining the basin
- Adaptable for supplemental air
- Mix and aerate deep tanks, up to 30ft (9m)
- Variable mounting options promote flexibility
- Components constructed of stainless steel
- Chemical resistant bearings promote durability in corrosive environments
- Non-slip coated walkways (optional) for ease of accesibility and maintenance
- Water lubricated motor

With more than 40 years of experience, we have proven we can offer a solution that is right for you.
